

The user will first see a splash screen/main menu with options.

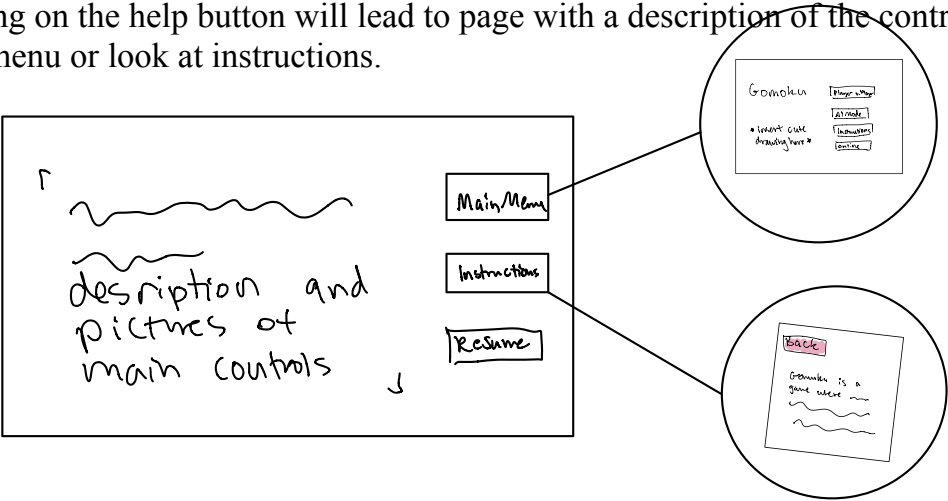

Clicking Instructions Leads to a description of the game and how to win. Hitting back will lead to the main menu

Clicking player vs. player will lead to the basic game board. Players can click to place their piece. Until confirm is pressed, players can also drag and move the pieces. They can press the help button to look up controls.

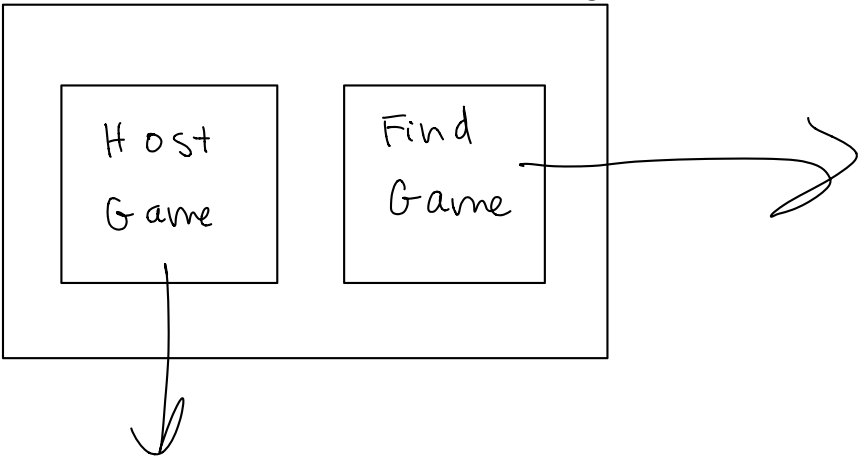

Clicking on the help button will lead to page with a description of the controls and options to go back to the main menu or look at instructions.

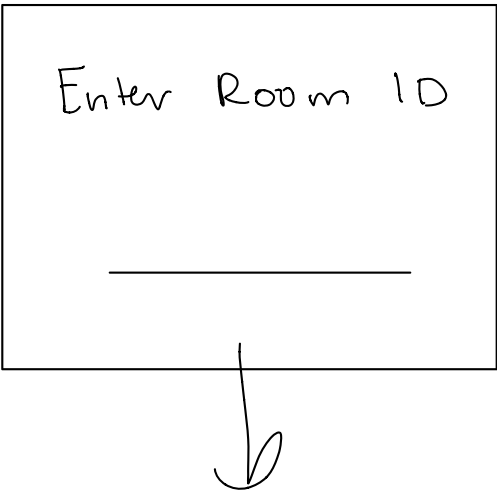

Pressing the online button will lead to menu where you can play on 2 devices (Player1 on device 1 and player 2 on device 2).

The user can either choose to host or find a game.

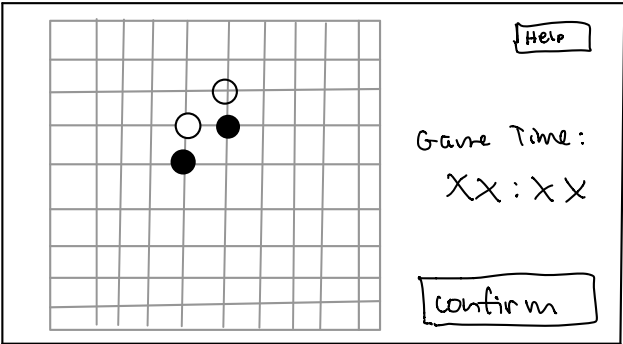

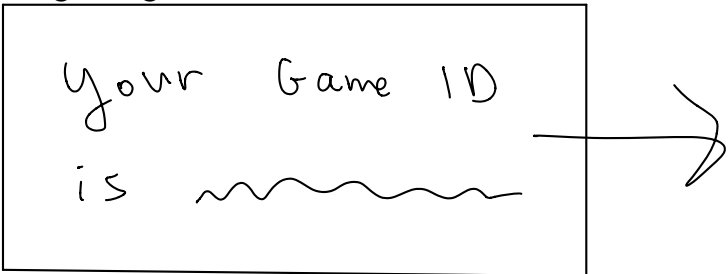

If room is already hosted, the user can enter the room ID.

Once both players are connected, the game will start with the same board as the local versions.

Hosting will generate an ID which user 2 can enter.

Once a player wins, there will be a winning screen and the player can return to the main menu
